### Description

Ebeestock's 75 Ohm DIN 1.0/2.3 connectors allow for a secure locking push-pull connection. These 1.0/2.3 connectors have an impedance of 75 Ohms and operate to 3 GHz, making these RF connectors an excellent choice for many data communications and audio/video applications. The small size of these 75 ohm 1.0/2.3 DIN connectors allows for a dense connector-to-connector footprint, saving valuable space in panels and other applications requiring a high number of interconnects. The durable positive locking connectors have a mating life of up to 500 connections. Ebeestock can also ship same day standard and custom cable assemblies using this popular connector.
