

50 Ohm BNC Male to 75 Ohm RCA Jack Push-On Adapter

RF Adapters Technical Data Sheet

ET1215

2

Configuration

- BNC Male Connector 1
- Push-On RCA Jack Connector 2

- 50 Ohms, 75 Ohms
- Straight Body Geometry

Features

Gold Plated Brass Contact

• 30µ in min Gold Contact Plating

Applications

• Allows Connection Between Series

General Purpose Test

Description

Ebeestock's ET12152 50 ohm BNC male to 75 ohm RCA jack push-on adapter is part of our full line of RF components available for same-day shipping. Our BNC to RCA adapter has a male to jack gender configuration. ET12152 BNC male to RCA jack adapter operates to 250 MHz.

RF adapters are often used to enable connections between two connector types that would otherwise not mate. Certain adapter configurations can also be used to protect connectors on expensive equipment where the number of connect/disconnect cycles is high. An RF, microwave or millimeter wave adapter is connected to the equipment, and the commonly changed connection is made with the adapter which can be easily replaced when it wears out after high usage; such adapters are referred to as connector savers. Ebeestock also offers bulkhead, panel mount, hermetically sealed, reverse polarity, and isolated ground adapter varieties to serve all of your RF, microwave and millimeter wave needs.
