

HN Tee Adapter Female-Female-Female

RF Adapters Technical Data Sheet

ET1235

7

Configuration

- HN Female Connector 1
- HN Female Connector 2

- 50 Ohms
- Tee Body Geometry

Features

- HN interface compliant with MIL-STD-348
- Contact plating according to QQ-S-365

Silver Plated Contact

Applications

General Purpose Test

Description

Ebeestock's ET12357 HN tee adapter female-female-female is part of our full line of RF components available for same-day shipping. Our HN tee adapter has a female-female gender configuration. Tee adapters (also called tee connectors) are three port devices that can be used to split or combine a signal. Unlike power dividers/combiners, however, they do not provide matched impedance at all ports.

RF adapters are often used to enable connections between two connector types that would otherwise not mate. Certain adapter configurations can also be used to protect connectors on expensive equipment where the number of connect/disconnect cycles is high. An RF, microwave or millimeter wave adapter is connected to the equipment, and the commonly changed connection is made with the adapter which can be easily replaced when it wears out after high usage; such adapters are referred to as connector savers. Ebeestock also offers bulkhead, panel mount, hermetically sealed, reverse polarity, and isolated ground adapter varieties to serve all of your RF, microwave and millimeter wave needs.
