

Precision SMA Female to N Female Adapter

RF Adapters Technical Data Sheet

ET1257

6

Configuration

- SMA Female Connector 1
- N Female Connector 2
- 50 Ohms

- Precision Design
- Straight Body Geometry

Features

- Max VSWR of 1.15:1 up to 18 GHz
- SMA Interface compliant with MIL-C-39012
- N Interface compliant with MIL-C-39012
- Gold Plated Beryllium Copper Contact

Applications

Allows Connection Between Series
 General Purpose Test

Precision Test & Measurement

Description

Ebeestock's ET12576 precision SMA female to type N female adapter is part of our full line of RF components available for same-day shipping. The SMA connector mates mechanically with commercially available 3.5mm and 2.92mm (K) connectors. Our SMA to type N adapter has a female to female gender configuration in a precision design. ET12576 SMA female to type N female adapter operates to 18 GHz. The Ebeestock RF adapter provides excellent VSWR of 1.15:1 maximum.

RF adapters are often used to enable connections between two connector types that would otherwise not mate. Certain adapter configurations can also be used to protect connectors on expensive equipment where the number of connect/disconnect cycles is high. An RF, microwave or millimeter wave adapter is connected to the equipment, and the commonly changed connection is made with the adapter which can be easily replaced when it wears out after high usage; such adapters are referred to as connector savers. Ebeestock also offers bulkhead, panel mount, hermetically sealed, reverse polarity, and isolated ground adapter varieties to serve all of your RF, microwave and millimeter wave needs.
